Did you know?

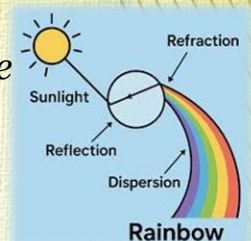

Why is a crab's stomach in its head?

Crabs have a compact body design, so their stomach is located in the head region to fit efficiently under their hard exoskeleton an adaptation shaped by evolution.

Why does rainbow need both sunlight and raindrops?

Raindrops act like tiny prisms. When sunlight enters a raindrop, it refracts, reflects inside and refracts again as it exits, separating white light into its different colors.

July 2026

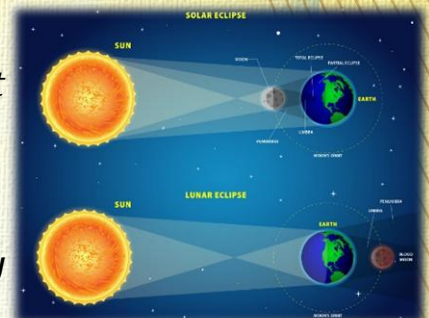

“Leadership Wellness : True leadership nurtures responsibility and inspires excellence in others.”

Date	Day	Scholastic /Co-scholastic Activities	Club

27/07/2026 To 01/08/2026	Monday To Saturday	PT- I Exam : Class VI to VIII & XI PT-II Exam : Class IX , X & XII	Exam Dept.

Did you know?

Why do solar and lunar eclipses not happen every month?

The Moon's orbital plane is inclined by about 5° relative to the ecliptic (Earth's orbital plane around the Sun). As a result, the Sun, Earth and Moon do not align perfectly during most full or new moons, which is why eclipses do not occur every month.

August 2026

“Social Wellness : Kindness and teamwork nurture wellness and inspire excellence in our school community.”

Date	Day	Scholastic /Co-scholastic Activities	Club
01/08/2026	Saturday	PT-I & PT-II Concludes

Did you know?

Why do some objects glow after the light is switched off?

Objects glow when the light is cut primarily due to phosphorescence, a process where materials absorb energy from light and slowly release it over time.

September 2026

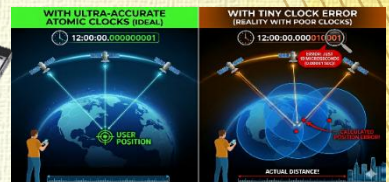

“Environmental Wellness : Caring for nature nurtures wellness and inspires excellence for a better world.”

Date	Day	Scholastic /Co-scholastic Activities	Club
02/09/2026	Wednesday	Class IX A Assembly : <i>"Emotional Wellness"</i>

28/09/26 to 10/10/26	Monday to Saturday	Term-I Exam : Classes - IX to XII	Exam Dept.

Did you know?

Why does GPS need accurate clocks?

GPS needs very accurate clocks because it calculates your location using time signals from satellites. Even a tiny error in timing can lead to large mistakes in the calculated position.

October 2026

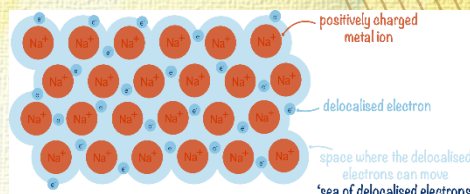

“Spiritual Wellness : Good values and gratitude nurture inner peace and inspire excellence in character.”

Date	Day	Scholastic /Co-scholastic Activities	Club
02/10/2026	Friday	Gandhi Jayanti / Lal Bahadur Shashtri Jayanti

31/10/2026	Saturday	Seminar for Students : Classes IX to XII	

Did you know?

Why does the resistance of many wires increase when temperature rise?

Higher temperatures cause metal ions to vibrate more vigorously. These increased vibrations lead to more frequent collisions between the conduction electrons and the lattice ions, hindering electron flow and increasing electrical resistance.

November 2026

“Creative Wellness : Imaginative minds nurture creativity and inspire excellence in expression.”

Date	Day	Scholastic /Co-scholastic Activities	Club
04/11/2026	Wednesday	Diwali Celebration	Green House

30/11/2026	Monday	Portion Completion for Term-II : Classes X & XII	

Did you know?

Why do green house gases warm Earth while still allowing sunlight in?

Greenhouse gases warm the Earth while allowing sunlight to pass through because they are selectively transparent—they allow high-energy shortwave radiation (sunlight) to pass through but absorb low-energy longwave radiation (infrared heat) emitted by the Earth.

This process is fundamentally based on the difference in wavelengths between incoming and outgoing energy:

December 2026

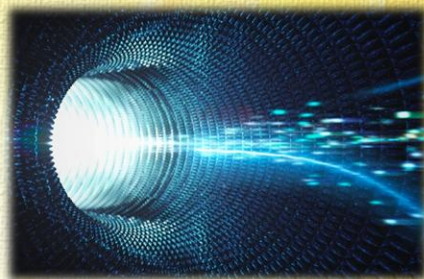

“Cultural Wellness : Respecting diversity nurtures unity and inspires excellence in understanding.”

Date	Day	Scholastic /Co-scholastic Activities	Club
05/12/2026	Saturday	Portion Completion for PT-III : Class IX

23/12/2026	Wednesday	Christmas Celebration	Blue House
24/12/26 to 02/01/27	Thursday to Saturday	Christmas Vacation	

Did you know?

Why can quantum tunneling let particles cross barriers?

Subatomic particles act as waves, not just particles. Their probability wave function does not instantly drop to zero inside a barrier but decays exponentially, leaving a non-zero probability of detection on the other side.

Why are semiconductors so important in electronics?

Semiconductors are essential to modern technology because they act as the "brains" and "hearts" of electronic devices, controlling, processing, and storing data.

January 2027

“Digital Wellness : Wise use of technology nurtures balance and inspires excellence in modern learning.”

Date	Day	Scholastic /Co-scholastic Activities	Club

28/04/2027	Wednesday	Feast of St. Louis De Montfort	

Did you know?

Why do onions make you cry?

When cut, onions release sulphur-based gases that irritate your eyes. This is actually a defense mechanism the plant evolved to discourage animals from eating it.

Why there are underwater “waterfalls” in the ocean?

Differences in temperature, salinity and density make water sink and flow downward, creating the illusion of waterfalls in places like near Mauritius.
